Description

Compute the intersection area of two circle.

Input

There are multiple test cases, each test cases include two lines.

The first line includes four real numbers, x_1, y_1, x_2, y_2 , denoting the center coordinate of two circles.

The second line includes two real numbers, r_1, r_2 , they are radii of two circle.

When input "0 0 0 0", your program should terminate and print "Over!"

$x_1, y_1, x_2, y_2, r_1, r_2$ are all smaller than 1000.

Output

For each test case, output the answer (the intersection area), PI is 3.1415 and you should retain two decimal places.

Samples

input	Copy
<pre>1 1 0 0 0 1 0 0 0 1 1 2 0 0 0 0</pre>	
output	Copy
<pre>0.00 3.14 Over!</pre>
