Description

This English game is a simple English words connection game.

The rules are as follows: there are N English words in a dictionary, and every word has its own weight v . There is a weight if the corresponding word is used. Now there is a target string X . You have to pick some words in the dictionary, and then connect them to form X . At the same time, the sum weight of the words you picked must be the biggest.

Input

There are several test cases. For each test, N ($1 \leq N \leq 1000$) and X (the length of X is not bigger than 10000) are given at first. Then N rows follow. Each row contains a word w_i (the length is not bigger than 30) and the weight of it. Every word is composed of lowercases. No two words in the dictionary are the same.

Output

For each test case, output the biggest sum weight, if you could not form the string X , output -1.

Samples

input	Copy
<pre> 1 aaaa a 2 3 aaa a 2 aa 5 aaa 6 4 abc a 1 bc 2 ab 4 c 1 3 abcd ab 10 bc 20 cd 30 3 abcd cd 100 abc 1000 bcd 10000 </pre>	
output	Copy
<pre> 8 7 5 40 -1 </pre>
