Description

A Fibonacci sequence is calculated by adding the previous two members of the sequence, with the first two members being both 1.

$$f(1) = 1, f(2) = 1, f(n > 2) = f(n - 1) + f(n - 2)$$

Your task is to take a number as input, and print that fibonacci number.

Input

100

Output

354224848179261915075

Samples

input	Copy
100	
output	Copy
354224848179261915075	

Hint

No generated fibonacci number in excess of 1000 digits will be in the test data, i.e. $f(20) = 6765$ has 4 digits.
