Description

Given a maze, find a shortest path from start to goal.

Input

Input consists several test cases.

First line of the input contains number of test case T.

For each test case the first line contains two integers N , M ($1 \leq N, M \leq 100$).

Each of the following N lines contain M characters. Each character means a cell of the map.

Here is the definition for chracter.

Constraint:

- For a character in the map:
 - 'S' : start cell
 - 'E' : goal cell
 - '-' : empty cell
 - '#' : obstacle cell
- no two start cell exists.
- no two goal cell exists.

Output

For each test case print one line containing shortest path. If there exists no path from start to goal, print -1.
