Description

Problem E: A multiplication game

Stan and Ollie play the game of multiplication by multiplying an integer p by one of the numbers 2 to 9. Stan always starts with $p = 1$, does his multiplication, then Ollie multiplies the number, then Stan and so on. Before a game starts, they draw an integer $1 < n < 4294967295$ and the winner is who first reaches $p \geq n$. Each line of input contains one integer number n . For each line of input output one line either

Stan wins.

or

Ollie wins.

assuming that both of them play perfectly.
