AI Code Tips

Description

We have dealt with double slash comments in *The Resurrection Competition*. How about dealing with all kinds of comments today?

Your task is extremely easy, delete all comments in given codes and **keep the format**.

Input

A common cpp source code. The characters in each line are less than 1000, there are not more than 100 lines. The invisible characters in the input are only '\t', ' ', '\n', '\r'.

Output

The code without comments. If a line only has comments and invisible characters, delete this line. (But if the line just has invisible characters, don't delete it)

See more details in sample.

Samples

input

Copy

```
main() {  
    // This is a comment  
    /* This is a comment, too  
    */  
  
    printf("Hello World!"); //also a comment  
}
```

output

Copy

```
main() {  
  
    printf("Hello World!");  
}
```
