Description

Little Sub loves eating apples and he has n apples initially.

In the following t days, Little Sub will eat k apples each day. If the number of apple is less than k , he will eat all apples instead.

Please calculate the number of apples after t days.

Input

In the first line, it contains three integer n, k, t ($0 \leq n, k, t \leq 2^{31} - 1$).

Output

Output the answer in one line.
