Description

Little Sub and Johann are good friends and they often play games together. Recently, they like playing with stones.

They have n piles of stones initially and they should make one of following movements by turns:

1. Erase a pile of stones.

2. Suppose there is a stone pile which has x stones, you can erase y stones from it but the greatest common divisor of x and y should be 1.

If someone cannot make any legal movement, the other person win the game. We all know that Little Sub and Johann are very genius and will always follow the optimal strategy. If Little Sub take the first move, please tell us who will win the game eventually.

Input

There are multiple cases. the first line contains an integer T ($1 \leq T \leq 100$), indicating the number of cases.

There will be two line for each case. The first line contains a integer n ($1 \leq n \leq 100$), indicating the number of stones piles.

The second line will be n integers A_i ($1 \leq A_i \leq 10^6$), indicating the number of stones in the i th pile.

Output

For each case please output exactly one line.

If Little Sub will win, please output 'Subconscious is our king!'. If Johann will win, please output 'Long live with King Johann!'

Samples

input	Copy
<pre>2 4 1 10 5 7 4 9 2 3 6</pre>	
output	Copy

Subconscious is our king!
Long live with King Johann!
